Vortex-DigJet
Hydro Excavating Nozzles (5,000 psi)

HYDRO EXCAVATING TOOLS

The patented Vortex-DigJet nozzles are designed for location of buried utilities. The swirling vortex of fluid from the jet creates a shearing action to drill into the ground. The concentrated jet gives a larger pattern than a fan nozzle while delivering high impact.

Features:
• Jet Intensification Technology
• Compact/Lightweight Design
• Predictable Wear
• Long Tool Life
• No Seals to Replace or Rebuild
