Vortex-SurfaceJet

Surface Cleaning Nozzles (20,000 psi)

SHOTGUN TOOLS

The patented Vortex-SurfaceJet cleaning nozzles are designed for cleaning curved, flat and irregular surfaces. The swirling vortex of fluid from the jet creates a shearing action to remove coatings and other materials. The concentrated jet pattern gives a larger pattern than a fan nozzle while delivering high impact. The shroud helps reduce blow-back while cleaning.

Features:

- Jet Intensification Technology
- Compact/Lightweight Design
- Predictable Wear
- Long Tool Life
- No Seals to Replace or Rebuild
- No Water Bearing

Model	Pressure		Volume		Connection	Weight	Diameter		Length	
	psi	bar	gpm	lpm			in	mm	in	mm
